

SUPPORT LOCAL MUSIC STREAMING

We're a local focused, under development live radio streaming platform for artists, fans and venues.

We're building livestreaming and social networking tools for IRL local scenes, starting with sound.

You'll be able to broadcast live music, do interviews, promote upcoming gigs and hang out online.
Broadcasts are optionally recorded and available to listen to later like a podcast.

Once our MVP (iOS app) is complete we'll welcome our first beta testers.

We've got a long list of cool features planned, so subscribe to our newsletter for updates and to find out how to become one of the first on the app. Thank you for helping us support you and your local scene!
